Certifications

Top-Secret/SCI	June 2024 – present
CI-Polygraph	May 2025 – present
Comptia Security+ Comptia	June 2025 – June 2028

Education

University of Pittsburgh <i>BS in Computer Information Systems and Technology</i> ◦ Focus in Software Application Development ◦ Vice President of the African Student Association	May 2024
---	----------

Experience

Software Engineer <i>IPTO3SSC Obscurity Labs</i> ◦ Intergrated user operation scripts to increase turn around time by over 50% ◦ Full-stack engineer developing in primarily in Python and React, with other languages as necessary. ◦ Carried out assigned Jira tickets to review business logic in a dynamic and adaptable software development process. ◦ Participating actively in the software development, testing, and peer review process utilizing Scaled Agile Frameworks. ◦ Collaborating cross-functionally with customers and teammates ◦ Code collaboration and development via BitBucket and GIT for project development	<i>Herndon, VA</i> Nov 2024 – present
Software Engineering Intern <i>American Refining Group</i> ◦ I developed a Microsoft Power Apps based company application for inter-departmental approvals, streamlining communication by automating email notifications and reducing turnaround time; migrated from SharePoint. ◦ Adapted software for oil dispensing machines to align with new government regulations and ensure compliance and operation. ◦ Created an intranet tool for swift accident reporting, enhancing safety staff efficiency, and reducing IT intervention. ◦ I collaborated with Purchasing Department to create a custom blind-bidding app integrated with SuiteCRM. This building a strong and working client relationship. ◦ Deployed a C#.NET application for inventory management to warehouse facility. Monitored and reported stock levels to SQL DB. ◦ Managed Active Directory Group Policy and permissions for RBAC on custom designed software and hardware tools. ◦ Handled incoming IT service tickets for branch faculties including M365 and other technology services.	<i>Pittsburgh, PA</i> May 2022 – May 2023
IT Support Technician <i>Islamic Center of Pittsburgh</i> ◦ Implemented local storage solutions (NAS) to efficiently manage and organize storage needs at facility. Staff utilizes remote access.	<i>Pittsburgh, PA</i> May 2019 – Oct 2023

- Responsible to develop comprehensive and custom documentation for software and hardware systems.
- Set up audio/visual equipment for events, including live streaming, presentations, and sermons.
- Image and deployed laptops for faculty staff and volunteers with necessary features and software.

Freelance Full Stack Web Developer

Chicago, IL

Magitech PC

May 2020 – Aug 2020

- Collaborated closely with the business owner to gather feedback and implemented improvements to meet evolving business needs.
- Created a user-friendly interface with intuitive navigation, ensuring a seamless user experience for clients.
- Utilized iterative design process to implement customer needs and improve user

Concessionaire Team Manager

Pittsburgh, PA

Cinemark Theaters

Nov 2017 – Apr 2020

- I led by example, consistently exhibiting a strong work ethic, and dedication to achieving both personal and team goals.
- Spearheaded inventory management efforts, maintaining optimal stock levels, minimizing wastage, and reducing operational costs.

Projects

Computer Desktop Screen Recording Application

Apr 2023

- Engineered a comprehensive suite of functionality, including capturing specific screen regions, screen recording, and buffered recording for screen history. This enhances the user's ability to document and review desktop activity.
- Implemented a seamless recording experience encompassing desktop audio, user microphone audio, and desktop video. Consolidated these settings into an intuitive UI delivering user-friendly .mp4 files for efficient review

Infrared Universal Remote Mobile Application

Apr 2022

- Recorded IR frequencies using an Arduino, enabling users to replicate and control IR device functions.
- Employed Android's Consumer IR Manager package to maximize Infrared communication capabilities. This enabled the application to interact effectively with a wide range of IR device.

HomeLab Services

Mar 2026

- Media Server
 - Burned dvds to host across all devices & watch from anywhere
- Nextcloud
 - Service akin to Google Drive hosting an Office Suite of tools with additional features
- DNS Sinkhole
 - Networkwide add blocking protecting my devices from malicious attacks

Additional Information

Skills: IT Support ◦ Remote Technical Support ◦ M365 Suite ◦ Linux (Ubuntu, Arch) ◦ Windows ◦ Networking ◦ Debugging ◦ Communication ◦ Creativity ◦ Patience

Technologies: Kubernetes ◦ Django ◦ Celery ◦ RabbitMQ ◦ Tauri ◦ FFmpeg ◦ QEMU ◦ AWS ◦ GIMP ◦ Blender ◦ Whisper ◦ CUDA ◦ Docker ◦ Jenkins ◦ Selenium

Programming Languages: Python ◦ Rust ◦ Javascript ◦ Visual Basic ◦ NI: LabView ◦ C# ◦ SQL ◦ Kotlin

Hobbies: Ping-Pong ◦ Car Repair & Detailing ◦ Vex-Robotics ◦ Fiction ◦ Butcher ◦ Open Source Projects ◦ Nonogram

Awards: Addition Gibson Grant
